FIRST-CLASS FURNISHED ROOMS TO RENT.

L. M. LARSON, Proprietor.

Here and There

Almost \$20,000,000 was spent in the manufacture of toilet preparations, soaps and washing compounds in Canada in 1932. A recently issued official report states that the total value of the former produced was \$5,073,134, and of the latter \$14,735,549.

Forty boy scouts of Oregon and Washington made the first leg of their 8,000 mile trip to Budapest in the Princess Kathleen, Seattle to Vancouver. They are travelling C.P.R. across Canada to Quebec, whence they will sail for England on the Empress of Britain.

Alaska and the Yukon hold their popularity as summer playgrounds judging by the stable list of passengers sailing north to Skagway in Canadian Pacific coastal liners. Many of them are mining and business men, but the majority are summer tourists attracted by the rate reductions for summer Alaska travel.

Forty-three years of "active, loyal and efficient service," with the Canadian Pacific Railway closed June 30 with the retirement of W. A. Kittarnmaster, General Western Freight Agent, Chicago. He was succeeded by E. L. Cardie, Assistant General Freight Agent, and the office which the latter vacated was abolished.

For the first time since its foundation 25 years ago, a Governor-General of Canada was present at the annual closing exercises of the Roy's Farm and Training School, Shawbridge, Que. recently, when the Earl of Beasborough, accompanied by E. W. Beatty, chairman and President, Canadian Pacific Railway, attended the school and awarded prizes to graduates.

"There are tangible signs of business and economic improvement in Canada and the United States," Sir Josiah Stamp, Director of the Bank of England, President of the London, Midland & Scottish Railway, and one of Britain's leading economists said recently when he sailed for England on the Canadian Pacific liner "Empress of Britain" after a short visit to this continent.

Ten Honolulu youths between 14 and 17 years of age arrived recently at Vancouver on Canadian Australasian liner "Monowai" en route to the Yukon where they will spend the summer in scientific research and adventure. They will sail north to Skagway, go into White Horse where they will build boats for the run down the Yukon River to Dawson.

Motion pictures of herds of caribou swimming the swift current of the Yukon River and other striking studies of wild life in the far north have been garnered by Harry Pollard, Associated Screen News photographer, who returned recently in the Princess Norah to Vancouver after six weeks in Alaska and the Yukon. He went on to Banff and Lake Louise where he will photograph mountain scenery.

A total of 616,215 persons visited the 18 national parks of Canada in the fiscal year 1931-32. These great reservations cover an aggregate area of 18,000 square miles. Each has its own attractive characteristics. There are three scenic and four animal parks in Alberta, four scenic parks in British Columbia, one scenic park in Manitoba and one in Saskatchewan; one historic park in Nova Scotia and one in New Brunswick, one recreation park in Ontario and two island park units.

A Social Evening.

Given in honor of Miss Dorothy Dodge of Edmonton, a social evening was held on Thursday last at the Becker home on the Meridian road. Eats were plentiful and attendants report to have had a very good time. Among those invited were:

The Misses Dorothy Dodge, Hazel Becker, Marguerite Gannon, Rachael Willie, Nora Kowensky.

The Messrs. Pat Gannon, Albert Wudel, Jim Jordan, Bill Gannon, Walter Larson.

"Talkies" for Stony Plain

Those who have been in the habit of going to the Capital, Rialto or other Edmonton picture houses for their entertainment will note with pleasure that a picture house is to be opened in Stony Plain in the near future. Mr. Goodman, of the Goodman Circuit Theaters, with houses at Ledue, Millet and Westlock, has arranged to put Stony on his circuit, with the first picture showing here on the evening of Friday, Aug. 4th. Watch the next issue for particulars.

Liberals to Meet August 5th.

A meeting of the Stony Plain Liberal Association is being arranged for the evening of Saturday, August 5th. It is understood that W. R. Howson provincial leader, will be the speaker, and it is hoped that the Honorable Charles Stewart will also be present.

It was hoped Mr. Howson would be able to speak at other points in the district prior to the meeting but, due to the many demands upon his time, this has been found impossible, but the meetings will be held in the Fall.

A new executive will be elected on Aug. 5th. If at all possible arrangements are going to be made to have the Rt. Hon. W. L. Mackenzie King visit Stony on Sat. Aug. 12. Altho it will be impossible for him to speak, it is hoped that many residents of this district will have a chance to meet him. Further announcements will be made in The Sun.

Good Business

Mr. A. E. Brunelle, the well-known agent for Singer Sewing Machine Co., who gave such a good demonstration of the Singer treadle and power machine at the recent convention in Stony Plain, of the United Farm Women, has been making an extensive tour thru this part of the Province in the interests of his company. Mr. Brunelle reports as a result of his tour, things are looking good particularly bright at the present time for the grain grower; and declares he would not be surprised to see a bumper crop throughout the district, and this, with the promise of a fairly good price which may be paid for grain, should prove a great help to the grain growers and others interested in the agricultural affairs.

A Dog With A Bad Name.

Alignment of the various countries participating in the World Economic Conference at London, England, into a Gold Bloc on the one side and a Sterling-Dollar group on the other, served to rivet attention of the world on the difficulties attending a conference of the kind. There is no gainsaying the fact that the people of all countries participating are anxious to see the conference reach some definite, if not spectacular, conclusions, but, despite this unanimity of desire for adjustment of the economic machine, the burning hunger of all peoples to end depression and restore world trade and purchasing power, memories of old crises hedge the inflationist suggestions with almost insuperable obstacles. It is a case of the dog with a bad name.

Countries of Europe, which with France and Germany adhere to gold, have painful recollections of their ventures into the realm of uncontrolled inflation. They remember the disastrous sky-rocketing of commodity values in relation to monetary units. They recall the hectic efforts to keep abreast of currency depreciation, and the desperate calculations, involving reckoning in astronomical figures, which maintenance of an ordinary family budget entailed. Inflation then means pressing presses working overtime, and the catastrophic uncertainty of day-to-day business. No wonder then that they hesitate to venture again from the gold anchorage.

Great Britain, the Dominions, the United States, and adherents of the Sterling-Dollar group, have not the same grim experience of frenzied reckoning. Britain has had a return to gold, and held herself white in the process of maintaining the standard. So much so that when the country eventually was forced off gold, it was with something of relief that the country abandoned its heroic efforts to maintain the pound at gold par, and allowed it to find its own level on world exchanges. The United States, having embarked on a policy designed to raise commodity price levels and revive moribund industry, has seen fit to release the dollar from gold, and is not to be persuaded to hitch it to any other monetary standard until experience has demonstrated the proper level at which it should be pegged for the country's good. The assurance the world now awaits is whether or not the United States will be able to control the inflationary process upon which it is launched.

London news would indicate that, whereas Britain abandoned the gold standard and apparently was allowing sterling to find its own level, in reality the pound, for some time, at least, has been maintained in position of some relationship with the French franc. Some measure of control, therefore, has been exercised in Britain and, in the result, there has been no appreciable disequilibrium between money wages and commodity values. The possibility is that the United States will pursue a similar course. That is to say, the dollar will be permitted to find a level at which the beneficial effects of the inflation are real and, in the position having been reached, a strenuous effort will be made to prevent the inflationary trend from going far enough to negate the good done.

The controversy between the members of the Gold Bloc and those adhering to the Sterling-Dollar group had the effect of forcing Great Britain to declare its inclination. It is noteworthy that, in the result, Britain threw in her lot with the Dominions and the United States, which would appear to indicate that Britain is looking toward these countries rather than to the continent of Europe for the trade opportunities essential to her economic wellbeing. London despatches have made it abundantly manifest that the British people are becoming more wedded to the idea of an Empire Economic unit, to the extent that such an idea is tenable. Indeed, at one crisis in affairs of the conference, when definite attempts were made to force its adjournment, there were many proponents of a scheme to organize a second Empire Conference from among the representatives of the British dominions now gathered in London.

The obvious deduction to be made from the propagation of such ideas is that, whatever the outcome of the World Conference, the trade relationships as between the Mother Country and the Dominions overseas are bound to be improved. Contacts established have proved fruitful. British opinion is emphatic for practical application of the Ottawa agreements and for their extension. Canada should not hesitate to capitalize this favorable attitude; and, with prices of the primary products moving upwards, the stage is being set for a real revival.

Costs Little To Operate

Small Airplane Weighs Less Than Thousand Pounds Loaded

One of the smallest airplanes built, a two-cylinder Aerocar, is proving its wings in high altitude flying at the Western Airfield at Denver, Colo., more than a mile above sea level. The plane weighs less than 1,000 pounds loaded, and can be operated for less than \$5 an hour, its owners say. It develops a maximum speed of ninety-five miles an hour and maintains a cruising speed of eighty-five miles per hour. It burns only two and a half gallons of gasoline an hour. The craft is a two-seater cabin monoplane.

Prince Likes Scotch Costume

Prefers Kilts When Full Dress Uniform Is Required

The Prince of Wales, who deputized for his father at the last levee of the season at St. James's Palace, is very fond of wearing the kilt on such occasions of State, which demand full dress uniform. The reason for the Prince's preference is simply that he likes it. A nursery in the latest innovation to be installed at the Montparnasse Railway Station in Paris which serves Brittany and La Vendee. From 40 to 50 babies may be cared for in this railroad nursery, the first to be established in France, which will shortly be imitated in the principal stations of the State Railways. If baby wants a bath, a change of clothing, a bottle of milk, an hour or two of sleep, all this will be available at the nurseries, and all of it will be free.

Bowel Complaints of Children During the Summer Months

Mothers should look well after their children during the hot summer months. Despite all they can do the children may be seized at any time, with diarrhea, dysentery, summer complaint, or other forms of bowel trouble.

There is a safe remedy in Dr. Fowler's Extract of Wild Strawberry; a remedy that has saved the endorsement of legions of Canadian mothers during the 80 years it has been on the market. Don't experiment. Get "Dr. Fowler's" and be on the safe side. Manufactured only by The T. Milburn Co., Ltd., Toronto, Ont.

Grain Elevators Busy

Rise in Wheat Prices Brings Changed Conditions

Saskatchewan wheat elevators are working night and day and there is a much happier situation there than has prevailed for a long time. Hon. Robert Weir, Minister of Agriculture, stated on his return to Ottawa, Mr. Weir has been for several weeks on a visit to his constituency of Melfort, Sask., and also visited much of the surrounding country. The minister said there was much more wheat in the hands of the farmers than has been realized and they are now disposing of it at 60 cents a bushel and more, with the result that conditions have taken on a brighter aspect. The activity of Saskatchewan elevators was without precedent, Mr. Weir said.

Some 50 municipalities had been badly stricken by the grasshopper plague, Mr. Weir said, and assistance would have to be given them.

Use Russian Lumber

Britain Reported To Be Importing Large Quantities This Season

The Morning Post states Timber Distributors, Limited, a group of British importers, announced in a letter to British firms interested in purchasing timber that they would import 693,000 board feet of Russian lumber during the coming navigation season.

The newspaper said Timber Distributors, whose previous plans to import Russian wood were stopped by declaration of the recently lifted embargo against Russian goods, told its clients it was adding 15 shillings to the contract price for the lumber to cover inconvenience caused by the embargo.

Even with this addition, the Post quoted the firm as saying, the price in the British market would be far below anything with which Canadian timber interests could compete.

Completes Cross-Canada Flight

Secretary Of Clubs Finds More Flying Being Done In Cities

George M. Ross, secretary of the Canadian Flying Clubs Association, landed at Sea Island Airport, Vancouver, completing a flight across Canada during which he visited all the Aero clubs en route. He made the final leg from Calgary in eight hours, flying the Moth 'plane presented to Major-General J. H. MacBrien, president of the aviation league, several years ago. It is the Moth fourth visit to Vancouver and its fourteenth trans-Canada flight. It has done some 86,000 miles.

Mr. Ross finds more flying is being done in nearly every city. "Fewer Canadians are going to the United States for their aviation training," he said. "In some parts of the east, in fact, the trend is the other way."

Soured On THE WORLD?—THAT'S LIVER

Wake up your Liver Bile

—No Calomel necessary

Many people who feel sour, sluggish and generally wretched, are the mistake of taking salt, oil, mineral water, laxative candy or chewing gum, or roughage which only sours the bowels and spoils the liver.

What you need is to wake up your liver bile. Start your liver pouring the daily two pounds of liver bile from your bowels. Get your stomach and intestines working as they should, once.

Cartier's Little Liver Pills will soon fix you. Purely vegetable. Safe. Sure. Quick. Ask for them by name. Refuse substitutes. See at all drug stores.

Railroad Station Nursery

Newest Innovation Established In France Will Be Free

A nursery in the latest innovation to be installed at the Montparnasse Railway Station in Paris which serves Brittany and La Vendee. From 40 to 50 babies may be cared for in this railroad nursery, the first to be established in France, which will shortly be imitated in the principal stations of the State Railways. If baby wants a bath, a change of clothing, a bottle of milk, an hour or two of sleep, all this will be available at the nurseries, and all of it will be free.

In the last two years 403 women have been appointed magistrates in London.

The number of illiterates in the United States is 4,233,753. This is a drop of 33 per cent. in a decade.

Cars Are Practically Immune To Lightning

Safest Place For Motorists If Storm Overtakes Them

If you are driving along the highway when an electrical storm comes up, and you seek a nice safe place to stay until the storm passes, just take the advice of experts, and stick right to the driver's seat.

The Bureau of Standards tells us that automobiles are practically immune to lightning despite the fact that rubber tires and the car as a whole become very wet during the storm.

Persons driving within a conducting enclosure are fairly safe against lightning, and the auto body, although enclosed to a considerable extent by glass, approaches this condition.

The average motorist is probably safer in his car during an electrical storm than in his home. Come to think about it, there are mighty few cases on record of autos being struck by lightning. And this is rather remarkable when you stop to consider the hundreds of thousands of cars out in electric storms, particularly in our larger cities.

Society Doing Good Work

Entomological Society Of London Meeting With Outstanding Success

More than 150 delegates, representing 22 counties, will assemble in London for the three-day centenary celebrations of the Entomological Society of London, England.

Economic entomologists in every country of the Empire are now fellows of the society, and in proof of the value of their work two outstanding successes may be instanced—the recent reclamation of three million acres of land in Queensland from the prickly pear, and the rescue of the entire coconut industry of the Fiji Islands from a little purple moth which had damaged the trees beyond bearing.

In each case success was achieved by the introduction of a parasite insect. The world's hope of controlling the migratory locust in Africa and Asia is also dependent on the economic entomologist.

Wonderful Trip For English Schoolboys

Have Left Manchester On Holiday Trip To Morocco

Twelve pupils at the Manchester grammar school, who have left for a holiday trip to Morocco, will be the first Europeans to inspect the hitherto forbidden city of Tzchewen. Permission has been granted to them on account of the school's friendly relations during previous trips with the Sultan and high officials.

In addition to exploring many little known parts of Morocco, the boys will also act as ambassadors for the Lancashire cotton trade. They are taking with them samples of Lancashire cloth, in order to impress the people of Morocco with its quality. As a result of doing this on previous visits many of the Moroccan hotels have purchased large quantities of such Lancashire goods as tablecloths and bed sheets.

Boom In Construction

Twenty-Six Cities Plan Building Projects Which Will Total \$100,000,000

Twenty-six cities in Canada expect shortly to undertake engineering and building projects amounting to \$100,000,000, according to a survey made by the national construction council. In all, questionnaires were sent to 54 centres, and it is expected the final figures will reach \$350,000,000.

Twelve local committees are to be appointed at strategic points in Canada, to be formed along similar lines to the national construction council, in order to carry out survey and research work in the various provinces for the national body.

Had New Experience

Canada's Governor-General has met with a new experience. He attended his first baby clinic. Doctors examined 25 lusty youngsters while Lord and Lady Beasborough looked on. The clinic was part of the program staged for their Excellencies as they visited Digby on their Nova Scotia tour.

Greatly Improved Prospects For The Western Canadian Wheat Grower Are Now In Evidence

A bear last year, a bull today, William Smith, wheat buyer for the Scottish Co-Operative Society presents a heartening prospect for the wheat growers of Western Canada.

He believes wheat prices will continue firm, and that there will be a good demand for Canadian wheat this fall. While the export market is sluggish because of a speculative flurry in the United States and Canada which has sent North American prices out of line with the world price, the Liverpool price has been climbing steadily and there is a good potential demand.

Importers and millers have been following a hand-to-mouth policy; the quality of the Argentine crop is poor; little Australian wheat is available—a factor which indicates a healthy demand for the new Canadian crop.

Nearly half the rise which has occurred in Canadian wheat prices is due to changing currency values, the pound sterling being stronger in terms of Canadian dollars. But world crop conditions have also been a considerable factor in the bulge. If speculators have taken undue advantage of these basic factors and have pushed the price out of touch with demand, the margin is not so great but that it will correct itself with comparatively little loss.

Evidently there is a real prospect that the Western Canadian wheat grower will be able to dispose of his crop somewhere around present, or better, levels. That means renewed buying power in Western Canada, better business throughout the Dominion.

The 1933 crop is being produced at the lowest costs ever achieved in this country. Eighty-cent wheat means a fair margin profit on the year's operations for Western farmers. It means that they will have money to spend for clothes, machinery, building supplies, the thousand and one articles which are normally in demand, some of which the farmers have been going without for a year or two because they were compelled to make the old ones do.

Every dollar of new wealth that will be brought to the farmers of the West by profitable wheat prices will mean at least five dollars in distributed purchasing power. The consistent improvement in business activity in the prairie provinces which has been under way during the past two months will work its way rapidly through the whole of Canada as the crop begins to come on the market. The worst of the economic storm is over for the Dominion. The sun has begun to shine again. Business is picking up and enterprise is sticking its head out of the storm collar. Winnipeg Tribune.

One Motive For Gift

Lindberghs Did Not Want Home Exploited As Show Place

It is entirely characteristic of Colonel and Mrs. Charles Lindbergh that they should turn over, as an institute devoted to child welfare, their former home near Hopewell, New Jersey, the scene of so shocking a tragedy concerning a little child. We can conceive of nothing more fitting nor more filled with a tender and imaginative justice. But it is a horrible comment upon American life that one motive of the Lindberghs in deeding the property over to child-welfare work was to save it from various promoters who wished to buy the scene of the Lindbergh kidnapping and exploit it as a roadside. In all the stories of crime, there have been few which have laid bare so many sordid motives as has this one.—New York Evening Post.

Holiday Toll Heavy

Lives of 144 men, women and children paid for the celebration in the United States of the 157th anniversary of the republic. Automobiles accounted for 62 deaths, 46 persons drowned, six died as a result of fireworks, and 39 were killed from other accidental causes.

Treadmill Dog Likes Job

Sets Record In Fatigue Experiment At Laboratory

Forty miles of running in six hours, with just one short halt for a drink of water, is a record set up by "Joe," a mongrel dog of large proportions, used in fatigue experiments at the Harvard University Business School Laboratory.

And the peculiar part is that "Joe" loves his job. His job is running on an electrically driven treadmill while scientists study his food consumption, blood circulation, temperature, etc.

The second Joe is released from his cage, he emits a loud "woof" and makes a dash for the treadmill and keeps right on barking until someone turns on the current. Joe can run for hours without getting tired.

The scientific tests are made to determine the organic changes resulting in the body from fatigue and to learn the extent to which fat and sugar substances are used up from exercise.

New Device Valuable

Photographic Appliance Is Of Good Service In Court Trials

Accurate details of scenes of accidents or crimes are claimed to be obtained from use of a new Swiss photographic appliance, according to a report from Consul George R. Ritzki at Zurich.

The process is an elaboration and extension of the system of mapping and making topographical surveys by terrestrial and aerial photography. The system provides a stereoscopic view of the objects from which the plot or diagram is automatically scaled. It is claimed that the results are accurate to within one-half inch in the usual street measurements.

The new device is designed only to simplify the procedure of accurately portraying the position, relation and dimensions of vehicles and other objects and highways.

By having the apparatus available at a few central stations it can be rushed to the scene and the photograph completed in a few minutes. The equipment is now in use in Zurich and is reported to be giving satisfaction.

It is claimed that necessary exposures may be made in five minutes, that frequent personal errors are eliminated and their permanent records may be made available.

Experiment Not New

Hypnotism For Tooth Extraction Used 45 Years Ago

Recent reports about a Pittsburgh dentist who hypnotizes patients before pulling their teeth brought from Rev. C. W. Hidden of Middleboro, Mass., the claim that he had participated in similar experiments 45 years ago.

He produced a clipping from the Newburyport, Mass. Herald in 1887 telling of an operation in which he hypnotized a woman patient before she was treated by Dr. J. M. Brown. The dentist at the time pronounced the experiment a complete success.

Much Approval Is Expressed Of Dominion-Wide Campaign To Stimulate Interest In Fish Products

Giant Clover Plant

Collector In Seattle Astonishes Botanists With New Find

Smithsonian botanists recently declared themselves astonished. In their hands they held some giant clover leaves sent by J. W. Thompson, a Seattle plant collector. He had found them growing on Washington sage brush slopes. He had never seen their like, nor had the Smithsonian men.

Each plant was nearly two feet high and bore flowers almost two inches in diameter. Most of the 300 species of clover have triple leaves, like the shamrock. There are "lucky" four-leaf freaks, and rare five and seven-leaf varieties. The Thompson specimens have seven leaves normally, which grow on long, eight-inch stems.

The astonishing aspect of the giant Thompson clover is that it should have been discovered so tardily in the U.S., a thoroughly botanized nation. It may be, opined Smithsonian Botanist Conrad Vernon Morton, "one of the last conspicuous new plants to be discovered in the U.S."

Quiet and Unpretentious

The Border Cities Star says "The church wedding of Barbara Hutton and Prince Alexis Mdivani, following the customary civil rites, was, as announced in advance, 'simple, quiet, and unpretentious.' A choir of 30 Russian singers furnished the music, four priests of the Orthodox Church officiated at the altar, the place was jammed to the doors, 20 newspaper and movie camera men perched on the front steps and the crowd in the street tied up traffic for an hour. In other words, no fuss at all."

MOUNTIES' UNIFORM CHANGES IN SIXTY YEARS

This year is the Diamond Jubilee of the founding of the famous Royal Canadian Mounted Police, formerly known as the North West Mounted Police. Organized in 1873 to take the administration of justice into the territories then recently acquired from the Hudson's Bay Company, the North West Mounted Police, then numbering 300, started on the long road to fame. Here we see two pictures of the Mounted Policemen. The top photograph shows a "Mountie" as he looks in his spick and span uniform in 1933. The bottom picture was taken at Fort Walsh in 1873, and shows a group of non-commissioned officers in the uniform then worn.

Joining in a letter to the Dominion Department of Fisheries, a number of fish dealers in Victoria, B.C., recently expressed approval of the campaign of fish cookery demonstrations and lectures which the department is conducting. Naturally, they spoke especially of the program given in their own city a short time ago, but they welcomed the campaign as a whole. Similar opinions have been expressed by other fisheries people elsewhere.

The purpose of the campaign, of course, is to increase popular interest in Canadian fish foods and their use and thus to benefit the fishermen and fishing industry by widening domestic demand for these products. The demonstrations and lectures are given by Mrs. Evelyn Spencer, the department's specialist in fish cookery, and in recent weeks the field covered has included a number of Prairie Province centres—Edmonton, Calgary, Lethbridge, and Medicine Hat in Alberta, and Regina and Saskatoon in Saskatchewan. As a matter of fact, the field has been very much wider than this group of cities, for the program included numerous radio talks which were heard over a wide area, and heard with interest, as was indicated by reports received by the stations.

At the request of the provincial fisheries authorities of Manitoba, a second program is now being given in that province. The first Manitoba program, given last autumn, was found so useful that the provincial authorities asked for additional demonstrations and meetings. After the Manitoba schedule is completed, Mrs. Spencer may speak before some Women's Institutes in Ontario and later in the year, it is expected, she will go to the Maritime Provinces.

Fish from all parts of the Dominion, and fish in different prepared forms, as well as the fresh and frozen product, is used in the different demonstrations. In the prairie states, for instance, whitefish and pickerel from prairie waters, British Columbia fish, including some Pacific oysters, and Atlantic coast fishes were all cooked and served to the audiences.

Similarly, in the addresses before public meetings and over the radio, Canadian fish foods generally are discussed, not simply fish and shellfish from one part of the country.

A Valuable Shorthorn

Prize-Winning Animal Shipped From Ontario To New Zealand

An aristocrat of the Shorthorn world, Brown Dale Bugler, Canadian National exhibition grand junior champion and winner of many other purple ribbons, left Caledonia, Ont. recently in a specially-fitted and disinfected car for Vancouver on the first lap of a 9,000-mile journey to New Zealand. Brown Dale Bugler was bred by James Douglas and Sons, of Caledonia and Paris, Ont. His sire, Crugshill Bugler, was one of the animals imported by the Prince of Wales for the E.P. ranch in Alberta, but was purchased by Mr. Douglas on arrival from Scotland in 1930 for Willow Bank Stock Farms here.

The junior grand champion was purchased by the Dominion Livestock Branch for a New Zealand breeder, who asked for one of the best young male Shorthorns in Canada.

Prehistoric Discovery

Said To Constitute The Most Important Missing Link Find To Date

A group of noted geologists from the Orient, headed by Dr. A. W. Grabau, arrived in San Francisco en route to the International Geology Conference at Washington, D.C.

Dr. Grabau announced the discovery of two nearly perfect specimens of the ancient "Peking man" which he said represented "the most important missing link discovery to date."

Dr. Grabau said the skulls and several jaws of teeth were found in rock caves which contained fossils of animals of the million-years-ago period.

WORLD HAPPENINGS BRIEFLY TOLD

Dr. E. T. Lila Burke, 58 years old, of Morrison, N.J., was the three-mile South visitor to pass through the gates at the World's Fair, Chicago.

Great Britain's unemployment figures show 144,771 fewer unemployed on June 26 than a month before, and 809,235 fewer than a year ago at that time.

Mr. Justice William Alfred Galtier, member of the British Columbia Court of Appeal since it was established 24 years ago, has retired because of ill-health.

Subscriptions and collections in the Toronto diocese restoration fund for Western Canada have already reached a total of \$240,061, or slightly more than 96 per cent. of the whole three-year objective.

Experimenters have come within one-quarter of a degree of Centigrade of producing absolute absence of heat. They produced, at the University of California, 459.1 degrees below zero Fahrenheit.

President Roosevelt has assigned two college professors—James H. Rogers of Yale, and George Warren of Cornell—to make a special study of United States government financing and balancing of the budget.

Governments of the United States and Canada have been given an interim report from the commissioners set up to arbitrate the "Im Alone" case, and the next scene in the proceedings will probably be laid in Washington.

The Communist party has taken vigorous steps to bolster up Soviet Russia's faltering railway transport system, ordering immediate creation of "transport political sections" to strengthen labor discipline and weed out hostile elements throughout the entire organization.

Future of the empire marketing board, the organization formed to stimulate sale of empire products in Britain, is still undecided. J. H. Thomas, secretary for the Dominions, indicated no agreement had been reached about dividing expenses of the board between the United Kingdom and other empire governments.

One Way To Decide

Einstein Advances Novel Test As To His Fame In Future

Professor Einstein appears to be something of a wit, for he has propounded a very good test of his fame with posterity. He says that if, in after years, the Germans declare that he was a German, and the French say he was a Jew, then he really was a great man. But if the Germans call him a Jew and the French are emphatic in declaring him a German, then there can be no possible doubt that he was a failure. The mathematician who has astounded and sometimes puzzled the world by his theory of relativity, is to receive an LL.D. from Glasgow University shortly. He intends to deliver some mathematical lectures at the same time which will be open to the public.

Useful In Many Places

Telescope In Toronto University Would Help Out Often

A two and a half ton glass disk has been ground for the great telescope which is to be installed at the University of Toronto. It is used that telescope would be in the front room of a Chicago flat during the World's Fair. You could see your relations from the country coming to stop at your house before they crossed the county line. There would be plenty of time to hang the sign on the front door, "Come to Europe, Will Not Return Until Christmas."—Chicago Tribune.

Stole Roosevelt's Gun

Possibly the thief who visited the North Dakota exhibit at the Century of Progress visited to have something to make a loud noise on the fourth of July. He took a revolver Theodore Roosevelt used as a young rancher at Medora, N.D. So treasured is the weapon that no questions will be asked if and when it is returned.

W. N. U. 2023

Steamship Tonnage

Gross, Net, Deadweight and Displacement Explained In Simple Manner So the Layman May Understand

Many people seem at a loss to know what tonnage means. The various kinds of tonnage are often a bit confusing. For the benefit of the Chicago Line has distributed the following information:

To begin with, vessel tonnage should not be confused with cargo tonnage. A cargo-weight ton is 2,240 pounds, while a cargo-measurement ton is 100 cubic feet. A vessel-measurement ton is 40 cubic feet. The carrying capacity of ships is limited by the amount of measurement space available within their holds, and by the amount of weight they can safely carry. This is called register or deadweight tonnage, respectively.

The five kinds of vessel tonnage are as follows:

Gross register tonnage.—The total enclosed space of a vessel, expressed in measurements tons of 100 cubic feet, including engine room, bunker (fuel) spaces, crew quarters, storeroom spaces, cargo spaces, etc.

Net register tonnage.—The total enclosed space of a vessel available for cargo and passengers, in measurements tons of 100 cubic feet.

Total deadweight.—The number of weight tons of 2,240 pounds, consisting of cargo, fuel, stores, supplies and fresh water for the boilers, etc., required to put a vessel down to her marks, her maximum load-line.

Deadweight cargo capacity.—The number of weight tons of 2,240 pounds, which a vessel can carry as cargo after deducting the weight of fuel, stores, supplies and fresh water required for the boilers, etc.

Displacement tonnage.—The equivalent of the weight of the water displaced by a vessel fully loaded and ready for sea; it is the largest tonnage dimension of a ship, but is not commercially important.

Helped Oil Lamp Industry

Depression Has Increased Working Forces In Glass Factories

Believe it or not, but it took the depression to bring a dying industry back on its feet and start paying dividends.

Increased demand for oil lamp chimneys and lantern globes since hard times had been felt, resulted in the doubling of working forces of a glass company in Fort Smith, Arkansas, and huge increases in others. Glass products have been slumping since the "horse and buggy" era.

An officer of one of the companies said the oil lamps are cheaper to operate than electric or gas lights. He also asserted the "back to the farm" movement had contributed to prosperity in the industry.

By Roth Rogers

TRIM AND JAUNTY JACKET
DRESS THAT WILL GIVE
DASH TO YOUR SPRING
WARDROBE

Good looking jacket dress for youth and youthful women types. It is navy blue thin woven weave with coral-red plaided crinkly crepe silk contrast.

It is effective too in grey crinkly crepe silk with navy crepe.

The jacket has the smart shoulders that jut out over the arms. And note the interesting back buttoned closing of the dress.

Interesting back buttoned closing of the dress.

Style No. 711 is designed in sizes 14, 16, 18, 20 years, 36, 38 and 40 inches bust.

Size 16 requires 3 1/4 yards 54-inch with 1 1/2 yards 35-inch contrasting.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

The greatest trouble with the world is that a great majority of people are trying to make something for themselves instead of making something of themselves.

SUNDAY SCHOOL LESSON JULY 23

ISAIAH DENOUNCES DRUNKENNESS AND OTHER SINS

Golden Text: "Righteousness exalteth a nation: but sin is a reproach to any people."—Proverbs 14:34.

Lesson: Isaiah 5:1-30.

Devotional Reading: Psalm 85:1-13.

Explanations and Comments

The Sin Of Greed, verses 8-10.—Woe unto the rich and powerful, cries the prophet Isaiah, woe unto those who are so avaricious for large estates that they "join house to house," seize houses of the poor, and in day would to field till there be no room [for the peasantry]. And ye be made to dwell alone in the midst of the land! The time would come when the land would be in the possession of only a few. The Hebrew law (Numbers 35:54) provided that there should be a proportional division of the land, and there were stringent laws against the alienation of hereditary family rights; see Lev. 25:1-17; Dt. 27:17. Every fifty years, the jubilee year, all lands that had been sold or given away were to revert to the family of the original owners. But the law was abrogated. "Behind the Hebrew regulations regarding the seventh year of fallow, the fifteenth year of release was the principle that 'The earth is the Lord's not the landlord'; that it was held in trust for the benefit of all the people. When the commercial development of Israel came, the primitive land system was lost. The independent farmers were impoverished by taxes laid to pay for wars by the merchants. The farmers became serfs. Economic ruin and social degradation followed. This is why the prophet cried the wrath of God upon those who joined land to land, and upon the religious leaders who 'devour widows' houses'."—John Bayne Ashcham.

"In mine ears saith Jehovah of hosts," Isaiah continues. "In Hebrew to 'say into the ears' does not mean to speak secretly and softly, but, as Genesis 23:10-26; Job 33:8, and other passages show, to speak in a manner that be distinct and intelligible, and excludes all misunderstanding. The prophet is able to distinguish the thought of his own age from the insinuation of Jehovah which rises loud within him."—Deitzner. "Of a truth many houses shall be desolate, even great and fair, without inhabitant," because the land will be barren. "For ye have despised my vineyard [literally, ten yoke, or ten times as much as a pair of oxen can plow in a day] shall yield one bath [the largest liquid measure, about eight gallons], and a homer of seed [the largest dry measure, ten or twelve bushels] shall yield but one ephah, a tenth of the seed sown."

"I'll fares the land, to every ill a prey, Where wealth accumulates and men decay."

A regular Ireland-Scotland air service has begun. Passengers are able to fly from Belfast to Glasgow in less than three hours. The usual time for steamer and train is about twelve hours. The actual air journey is 75 minutes.

Something To Think About

Canadians Not Bothered With Bank-Ing Troubles Like United States

W. L. Clark, writing in Border Cities Star, says some of the banks in Maine have not reopened yet. Closed for about three months, the bank holiday has hit some people hard. Here is a case told about in Portland. A man, formerly of Montreal, had a savings account in one bank. He wanted some money for a business transaction and instead of drawing his savings, he borrowed from the bank and put up some Government bonds as security. Then the bank closed.

The savings account of the man is more than sufficient to cover the loan he got from the bank. But they will not apply that amount against his loan. Instead, they are trying to sell his Government bonds to raise cash to pay off the loan. In other words, they not only have gobbled up the customer's savings, they also want to swallow his Government bonds as well.

This was just one of the stories we heard. Another man sold a timber lot for \$30,000, put the cash in the bank one afternoon and the second day following, the bank shut down. He has not been able to touch a cent of the \$30,000 since.

Many a widow, orphan, school, religious institution and other persons or organizations, who could ill afford to lose, had their funds go in the crash.

All Canadian who are talking about what the banks should and should not do might think of these things. Nothing like that has happened in Canada through the present depression.

Encouragement For Spain

Recent Fight Broke Atlantic Record For Distance And Time

In flying from Seville to Cuba the Spanish-built and Spanish-engined "Cuatro Vientos," Captain Barberan and Lieutenant Collar have broken the record across the Atlantic for distance and time. For the encouragement of aviation Spain needed an achievement like this. Her name, it is true, has been kept before the world by intrepid pilots like Commander Franco, who with three other army officers made a flight to South America in January, 1925, and the following year flew from Spain to Brazil and Argentina, 6,222 miles, in sixty hours; Captains Loriga and Gallarza, who in 1926 accomplished the feat of taking a Spanish plane from Madrid to Manila; and Captains Jimenez and Iglesias, who crossed the South Atlantic to Bahia, Brazil, 4,200 miles in forty hours less five minutes, March 24-26, 1929.

Spain has given to the world a great inventor in Juan de la Cerva, of whose autogiro Thomas A. Edison said that it answered the question whether an airplane could be built that would take off and land in a small space, and be practically fool-proof and easy to fly. This odd-looking plane has undergone improvements in England and the United States, and has been flown to the Pacific Coast and back. It is still a question whether the autogiro will be able to compete with the standard airplane as a transport machine. For light commercial and pleasure flying it is coming into use.—New York Times.

Cleveland Port-Of-Call

Freighters From Holland Making Use Of Welland Canal

Cleveland has become a port-of-call for the ocean-going freighters of one enterprising steamship line.

Through use of the Welland Canal, the freighters, the "Havtor" and the "Vardeljel," out of Rotterdam, Holland, have gained entry to the rich Great Lakes ports.

Boat owners would about 250 feet long and draw only about 14 feet of water.

The shipping manager of one large industrial concern here declared that freight rates from Cleveland to Rotterdam via water are the same as railroad rates from Cleveland to Baltimore.

Farm Tractor With Air Balloons Makes New Record

Frank Brisko, noted racing driver at wheel of tractor with which he set an official world speed record of 35.4 m.p.h. for five miles. The other helmeted racing driver is Chet Gardner, and beside the big tire are Bill Cummings, left and Shorty Canlon, right—all famous race drivers. Behind the driver is Albert Schroeder, farmer who gave a plowing demonstration with this Firestone air tired Allis-Chalmers tractor. At the left is the \$30,000 F.W.D. racing car Brisko drove after the tractor run.

Farm Tractor With Air Balloons Tries To Make New Record

Enthusiasm of farmers for pneumatic tire tractors is making tractor manufacturers seek higher speeds to make the tractor more valuable for hauling or travel, and for use as an all-purpose farm machine. The most interesting speed performance is the recent official AAA record of 35.4 m.p.h. for five miles made by a tractor at the Wisconsin State Fair Grounds AAA race.

Thousands of people watched Albert Schroeder, a prominent Wisconsin farmer, using a new standard

farm tractor equipped with the new Firestone Low Pressure Tractor Tire, plow several rows of the hard uneven ground inside the race track oval. Mr. Schroeder then unhooked the plow and turned the tractor over to Frank Brisko, a famous race driver, who was one of the leaders in the Indianapolis Race this year. The crowd was amazed to see the tractor streak down the straight stretches—at times travelling 40 miles an hour.

A new four-speed transmission development combined with the pneumatic low pressure tire development made possible this unheard of speed.

At the end of the run, Frank Brisko, asked how he liked the ride, said "It was just like driving a passenger automobile."

The new highway speed and comfort now available in farm tractors shows how completely the tractor, with these big tires, serves as an all-purpose machine. Demonstrations in parts of the country have proved to farmers that tractors using these tires give greater fuel economy in farm work. Greater tractors do not pack seed beds, make the farmer's work easier, and save time as well as money.

TRUCE EFFECTED WITH GOLD BLOC AT CONFERENCE

London, Eng.—Monetary questions, tariffs and import quotas were finally cut out of the agenda of the world conference in an amicable truce with the European gold bloc.

Great Britain, the Dominions and the United States acquiesced in the gold-standard nations' view that nothing can be accomplished satisfactorily on the more important monetary questions so long as there is no stabilization of currencies until the U.S. changes its attitude.

To this extent the conference was right back where it was in the crisis of last week but there was an important difference. Then the incensed gold-standard delegates were ready to quit the party. Now they are well satisfied monetary questions are dropped and they will keep on working at the other questions.

The conference will go on, but it is expected to continue only two or three weeks in order to reach agreement on the non-contentious questions left on the agenda. Then the plan is to adjourn the conference proper until the fall, leaving some committees at work and hoping that before the conference meets again the U.S. will be willing to stabilize currencies. In that event the conference might tackle the monetary programme originally laid before it. Many delegates were very hopeful about this end.

Prime Minister R. B. Bennett, who characterized the decisions as permitting the work to go smoothly on, is prepared to return with the Canadian delegation at the end of July.

The steering committee accepted the recommendations of a special drafting committee of the full monetary commission, a committee of which Premier Bennett was a member. It decided it was no use going on with problems on which unanimity of agreement is not likely.

The questions left are indecisive, meaning long and short term commercial loans, not war debts; along with central banking co-operation, creation of central banks in countries which have not got them now, rehabilitation of silver and other questions on which the respective sub-committees think there is a chance of agreement.

A whole host of projects is under way outside the conference proper and the outlook for some of them is most promising. Canada especially has been working actively with the other Empire delegations on furtherance of Empire trade and straightening out the Empire currency tangle, but what progress if any has been made on these topics of vital interest to the Empire is being closely guarded.

There is also wheat, timber and silver. Negotiations are said to be progressing very favorably on wheat. The Big Four—Canada, Australia, the Argentine and the U.S.—are already agreed in principle on limiting production, regularizing exports. They are understood to have gained a considerable measure of co-operation from the European exporters. Now they are working on the importers.

Much of the groundwork for restoring the world's timber markets has been done, since Canada's earnest declaration that if Russian dumping continued to wreck the English market for her, she would ask the United Kingdom to make good her promise to maintain the imperial preference intact. All countries interested will be busy during the summer organizing statistics of their production and exports, studying collective agreements.

Powder Stores Robbed

Winnipeg, Man.—Believed to have been perpetrated by a gang of rafe bikers, seeking material with which to crack strong boxes, City of Winnipeg's powder magazine at Stony Mountain, Man., has been broken into and a large quantity of dynamite, fuses, caps, and detonators stolen. It was disclosed Wednesday. The crime is believed to have taken place last Thursday night.

W. N. U. 2008

Factor Is Freed

Abducted Millionaire Is Released By Captors

La Grange, Ill.—John Factor, millionaire market plunderer, held prisoner 12 days by kidnappers, was released here Wednesday night after payment by his friends of ransom estimated at \$200,000.

He walked into the La Grange police station and reported that he had been freed by his captors a short distance away and instructed how to reach the place by street car.

He was held by the officials pending arrival of a squad of Chicago detectives and federal agents.

Factor, according to the sergeant, appeared little the worse for his experience. He was clean shaven and neatly attired.

He asked for the use of a telephone to get in touch with members of his family who had kept vigil at his Morrison hotel headquarters since the kidnapping.

Whale Attacks Schooner

Crew Of Small Fishing Boat Had Narrow Escape

Pope's Harbor, N.S.—Captain Howard Daye and the crew of the fishing schooner "Evelyn M. Young" made port safely after a thrilling encounter with an enraged whale off the Nova Scotia coast.

The little vessel was home to 11 miles off Pope's Harbor when a 50-ton whale, which attacked at night. The whale slashed into the vessel and the blow sprung the schooner's seams. Water started to enter the hold.

Captain Daye turned the "Young" for Pope's Harbor and made port before morning. The vessel was in a sinking condition and had to be grounded.

Ten Ships Still Unsalvaged

No More Vessels To Be Raised From Scapa Flow

London, Eng.—The last of the German warships to be raised from Scapa Flow, the battle-cruiser "Von der Tann" has been taken to Rosyth to be broken up. This ends the greatest feat of salvage ever undertaken.

It was on June 21, 1919, that the German high sea fleet was scuttled. Eleven battleships, 13 cruisers and 50 destroyers foundered, mostly in deep water. Salvage work was started in 1924. Thirty-two ships, including the 28,000-ton battleship, "Hindenburg," have been raised and taken to the break-up yards. Ten ships still remain under water, but it has been decided not to raise them.

May Have Escaped Death

Boy Plunges Into Niagara Gorge To Escape Police

Niagara Falls, Ont.—A death-defying leap into the Niagara gorge near the whirlpool by an identified 17-year-old youth after he had been handcuffed by provincial police is believed to have resulted in his escape. Police said they came upon the youth in the act of stealing copper wire from electric light poles near the edge of the embankment. The handcuffs had just been placed on the youth's wrists when he suddenly wrenched himself loose and plunged over the bank.

Police thing his fall was broken by shrubbery and that he ended them and escaped.

Nova Scotia Elections

Halifax, N.S.—Nova Scotia's provincial general election will be held on Tuesday, August 22. Premier Gordon S. Harrington announced late Wednesday night, with the approval of the lieutenant-governor. The present general assembly will be dissolved Thursday, and writs issued for the election. Nomination day is Aug. 15.

Nurses' Convention

Paris, France.—Thirty-two nations are represented among delegates at the international congress of nurses here this week. Canada has sent 125 delegates. Africa 25 and the United Kingdom 300, but there are no nurses from Soviet Russia. Altogether, 2,000 nurses are attending.

Interest in silver mining is being revived in Mexico.

NEW MINISTER

Sir Eric Drummond, British Secretary-General to the League of Nations since its inception, has been appointed British Minister to Rome. Sir Eric Drummond resigned from the League post recently.

Usefulness Has Been Proved

Hon. Hugh Guthrie Upholds Section 98 Of Criminal Code

Calgary, Alberta.—Section 98 of the criminal code was upheld by Hon. Hugh Guthrie, Minister of Justice, in addressing the Calgary bar association. This section of the criminal code, containing prison terms for those advocating constitution changes by violence and threats of violence, had proved useful recently, he declared.

In his brief address, the minister of justice described his duties and problems. He said the law set forth in section 98 did not interfere with any law-abiding citizen. At the same time, he concluded, it had come in very handy in dealing with certain disturbances arising out of unemployment problems.

Inaccurate Statements

Resents Report That Roosevelt Wrecked Conference

Plymouth, England.—Laurence A. Steinhardt, United States Minister to Sweden, on his arrival aboard the "De France" described as inaccurate statements he was carrying new instructions from President Roosevelt to the American delegation to the world economic conference. Mr. Steinhardt said he would spend a week in London before leaving for Stockholm.

"It think it is grossly unfair and inaccurate to say President Roosevelt wrecked the conference," the minister said.

Dogs Travel By Plane

Calgary, Alta.—R. B. Carter and Dr. G. L. Krohn, both of Assiniboia, Sask., brought their two prize dogs to Calgary's annual canine show by aeroplane. The Boston bull and Scotch collie made the air trip from Assiniboia in time to enter the judging Wednesday.

Pool Elevators

Saskatchewan System Shows Increased Business

Regina, Sask.—Handlings of the Saskatchewan pool elevator system showed an increase during the crop year 1932-33 over the crop year 1931-32.

The company will presently make its final payment in full to the liquidators of the Saskatchewan Co-operative Elevator Company on account of the purchase of that elevator system and also the mortgage to the provincial government on the same account. The total account involved is close to \$2,000,000.

These statements were made by L. C. Brouillette, president of the Saskatchewan Wheat Pool, at the Wheat Pool committee convention of contract signers of the Regina area recently.

Mr. Brouillette said further that the pool would this fall make the first payment on principal under the agreement with the government on account of the 1929 over-payment guarantee.

Operating policies for the crop year 1933-34 are to be the same as at present. The grower may either deliver a seasonal pool or to the open market. He spoke in favor of an international export quota plan, which he said the organization now definitely favored.

He was convinced that acreage reduction by legislation was impracticable. He stressed the value of a grain reserve carried on farms, which would be the essence of the grain quota scheme.

Referring to the World Economic Conference at London, Eng., he expressed the opinion that if it accomplished nothing else than to bring about some measure of understanding as far as the world wheat problem was concerned then it could be deemed as a success.

Canadians Welcomed

Rudyard Kipling Addresses Touring Authors' Association

London, Eng.—Canada, her glorious past and her wonderful future, the great inheritance she has had from the mother country, formed the theme of a vividly-phrased address by Rudyard Kipling when he made one of his few public speeches to welcome the touring party of the Canadian Authors' Association.

G. K. Chesterton was another celebrated speaker at the luncheon tendered the visiting Canadian writers by the Royal Society of Literature. The Marquess of Crewe presided and many notable Englishmen were present.

A New Pest

Ottawa, Ont.—The Japanese beetle which according to United States research officials will eventually spread from coast to coast, attacking crops and flowers, has not yet come to Canada, agricultural officials said. Whether the Canadian winters would be any protection against the pest is therefore not known.

"BRAIN TRUST" HEAD IN LONDON

Assistant Secretary of State Raymond Moley (left), confidential adviser to President Roosevelt, pictured with Herbert B. Swope, outside the conference hall in London, where the economic parleys are being held. Moley is acting as liaison between the President and the American delegation to the Conference.

SIR JOSIAH STAMP APPROVES U.S. RECOVERY PLAN

New York.—Sir Josiah Stamp, British financier and economist, approved President Roosevelt's recovery programme in an address from London.

"I am one of those who think that the president's policy is to a large extent indeed right because all regular expedients have failed," said the text of his speech as made available here.

"Although I do not think that the control of industry can ever have more than a limited success at best and may create great insecurity at its worst, people on this side do not realize the depths of the difficulties into which the United States' price-level collapse and banking collapse have brought her industrial activities and how necessary it was for such striking measures to be put forward."

"I would also say that so far the public use made of the existence of the powers, as distinct from the actual use of the powers themselves, has also been useful."

"The great thing I have to fear is too high a degree of speculative activity with its inevitable reaction."

Wheat Output Reduction

Matter Discussed At U.F.A. Meeting In Edmonton

Edmonton, Alberta.—Curtailling of wheat production was the main topic of discussion at the session of the U.F.A. members' annual get-together meeting in the council chamber of the parliament buildings here. The general question of crop conditions in relation to the economic situation, was also considered in a preliminary way.

The majority of the members taking part in the discussion expressed agreement with the action taken thus far in respect to reduction of wheat acreage. In view of the recent improvement in price levels, however, no decision has yet been reached as to what measures of curtailment will be necessary.

Fodder relief in the southern and eastern parts of the province will likely be needed to some extent, it was believed by members from these districts, and this will be one of the matters to be further discussed.

On a Holiday

Mrs. Roosevelt Visits Quebec City On Motor Tour

Quebec, Que.—Mrs. Franklin D. Roosevelt, wife of the president of the United States, who drove her own roadster into Quebec, after traversing several of her own United States gave a few minutes to reporters in her sitting-room in a hotel here.

"I am on a holiday," the first lady of the United States said, "and that means I have no definite plans."

Before returning to Washington at the end of a fortnight, Mrs. Roosevelt said she intended going to her cottage at Campello, N.B.

Pay Is Protested

Windsor, Ont.—Protest against what was described as employment of single men by the department of militia at various military grounds for 20 cents per day, was registered by Essex county trades and labor council. The protest will be sent in a resolution to Dominion government officials.

To Attend Grain Show

Quebec, Que.—Hon. Adolphe Godbout, Quebec Minister of Agriculture, accompanied by J. A. Grenier, deputy minister, and Paul Methot, chief of the seed grain section of the department, are in Regina, to attend the World Grain Fair.

Manitoba Bond Issue Sold

Montreal, Que.—The \$3,500,000 issue 5½ per cent. Province of Manitoba bonds due July 1, 1938, has been completely sold and books closed. It was announced here. The bonds were priced at \$93.50 and accrued interest to yield over six per cent.

Deposits in the post office and trustee savings banks in England increased more than \$108,000,000 last year.

A Speech of Importance.

"Everybody agrees, apparently, that a main trouble with the world today is in regard to the distribution of products," says the Philosopher in the National Home Monthly. "You might have thought 30 or 40 years ago (if you are old enough to have been doing any thinking then) that distribution would be most satisfactory when there is most to distribute. But plainly that is not true. The peculiarity of the present predicament is the vast abundance of things which cannot manage to get themselves distributed. A radically different state of affairs from that pictured in the story of the loaves and fishes, when the multitude sat down and the distribution was satisfactory and there was a surplus. Although there is now not a scarcity, but a superabundance, of things needed, it begins to be more and more evident that the world must go back to much earlier utterances than those of even our wisest and most celebrated economists and politicians of today. Those earlier utterances are to be found in an address which is recorded in the same book which contains the story of the loaves and fishes. It is known as the Sermon on the Mount."

Preparing for an Election.

In view of the fact that Stony Plain district is in the newly-organised Federal constituency of Edson-Jasper, the following from the Edson Jasper Signal should be of interest to us:

"With the newly-formed Edson-Jasper constituency now established fact and an election not so very far away, local politicians of the Liberal and the Conservative ranks are beginning to look to their fences. As far as we know, there has been no attempt at organisation on the part of any third or independent group.

"The political stripe of the new constituency is not definitely established, and both old parties will make an effort to capture the seat. We presume it is not too much to expect that the newly-formed CCF group will take a strong crack at it.

"From a Federal point of view this part of the dominion has had a raw deal for many years past. It is one of the richest in natural resources in the west and the finest hunting ground in Canada. The new constituency needs a man who will have strength rather than party affiliations, and it seems that it would be a good time for the various political groups to get together in the interests of the district."

The Poor Bishop.

The bishop was weary. This was the third class he had confirmed that Sunday. His attention began to wander. Placing his hands upon the shiny pate of the last candidate he said "I declare this stone to be well and truly laid."

Tennis Notes.

A great deal of enthusiasm for the game of tennis has been stirred up as a result of the keen competition that was shown in the July tournament. No great upsets have as yet occurred, but all matches have been close, and some good tennis has been seen. In the first class, only a few of the matches have been played. The only one completed in this class was the Cullen-Thomas draw which the former won by scores of 6-3, 6-4, 7-5. Lewis and I. Gately are tied, with 6-8, 5-4. Cullen will now meet W. Oppertshanser in semi-finals; winner to meet winner of first 2 series.

In class B O Oppertshanser defeated P. Comisarow 6-2, 8-2, 6-0. Barth defeated O. Wudel in closely-contested matches 6-4, 5-6, 6-5. Larson defeated H. Gately by 6-4, 4-6, 6-2, 3-6.

The next draw—Barth v G. Oppertshanser Larson v L. Wudel. The winners of these matches will meet in finals.

—Ladies Singles Draw—

E. Malloch v M. Gannon
M. McCulla v E. Everett
E. Gately v E. Wudel
C. Donaldson v H. Shoults
N. Kowensky v M. McCulla
M. Clark v B. Mundt
Mrs. Lewis v Mrs. Yeats

Commandment No. 11.

Moses (not the Corporal) was supposed to have received the Ten Commandments on the peak of a mountain, but the Nazarenes have given us another, says The Athabasca Echo. On their window they give the Eleventh as "Thou shalt not peak." We are guilty of wrong spelling sometimes when the letters get into the wrong box, but we hope we shall not get into the wrong box if we say "Peak" "Peep! Peep a-boo!"

Holborn Junior U.F.A.

Holborn Juniors held their special meeting July 19; a report of Junior conference held in Edmonton was read by Miss M. McDonald, who was made director of R. and W. Edmonton: she won first prize on her quill; Bustr MacDonald won first prize for the boys.

Mr and Mrs Anderson returned last week as happy as ever, but faithful old Bluebird had been replaced by a Chevrolet coach. Mr Andersons sister and her husband are spending their honeymoon at the A. P. Anderson home.

S. Wright, a man of great achievements, has been persuading patient hosts of burden to revolutionise the scenery at the school ground.

Holborn Jrs. will hold a dance on Aug. 11.

There will be a prize shoot July 28 at the Rifle range.

Mr and Mrs H. Ducholke held their wedding dance July 15 at Strawberry school; a big crowd attended; on their arrival the Newlyweds were marched around the hall while the local band played the march—H. J. R.

Baseball Prattle—By H.C.O.

I'll answer the question which everybody is asking first. I've talked with a few people lately, and they say we've dropped from the league. Well, we didn't; they may have dropped us from the league, but no one can say that we quit. The management will endeavor to either re-enter the league or play the remaining games as exhibition affairs in Stony; our ball season is long from being finished as yet.

Stony has played no games since last week; the scheduled game with Morinville was called on account of rain; it will probably be played at a future date.

Stony's hustling Juveniles are going to tackle a team at Carleton Place, 1 mile east of Morinville, next Sunday.

Church Services.

Services in St. Philip's Church next Sunday, 9.30 a.m.
Service at Rosenthal Lutheran church next Sunday, is at 10.45 a.m.

German Lutheran services will be held in Stony Plain next Sunday at 2.30 p.m.

United Church service every Sunday Evg. at 8.

There will be no English Lutheran Church Service in Stony Plain during the month of August.

CHAPTER XIII.—Continued.

As he went out along the slope toward the post, he was realizing, with bitterness of heart, that his sacrifice eighteen months ago, the greatest sacrifice a man can be called upon to make, had been worse than futile. It had cost him dearly, it had brought pain to Joyce, it had brought them tonight to their hour of separation. And yet, through his bitter mood ran

the knowledge that in his sacrifice he had set all personal desires aside and had kept faith with a partner dead and had held sacred his promise to Curt Spaulding, until Elizabeth herself had made that promise impossible of fulfillment.

Again he lived over that hour when he came upon a trapper's deserted, snow-drifted hut, and found Curt there, stricken with the disease, with both lungs frozen, deserted by his treacherous Indian helper, dying as valiantly as he had lived. He felt that no man on earth could understand the emotion that racked him as he knelt beside the bunk, whispering to a partner who was going down into the dark, leaving a sister penniless, alone in the savage North.

"Alan, she loves—you," he could hear those broken whispers that presently were stilled. "If you'd marry her—my sister, Alan . . . I wouldn't mind—going—if I could think of you—partner and brother, too. . . . And over and over again that dying whispered plea, and the ineffable peace that came when Alan made covenant, "I will, I will, Curt. I love her, too, because she's your sister."

And now, as he thought of that one funeral shed trip home, and as he glanced up the slope toward Curt's towering lobeck, his lips fashioned silently:

"I tried, Curt. You wouldn't have asked more of me than what I did. But it couldn't be, it couldn't be."

Joyce had helped Bill take her personal baggage down to the wharf, and had talked over with him final arrangements about forwarding the poetry to Edmonton and selling the trading store. Waiting for the steamer she had quietly stepped out of Mrs. Drummond's house into the garden

back of it, telling no one where she had gone.

She was aware that Alan intended to come down before she left, for half an hour with her. She had slipped out in the garden to make that impossible. If he came down to the wharf at the last moment, she felt she could say good-bye calmly enough, with a brief handclasp a voyageur's nod and bow chance, but a longer time with him would be unbearable.

As she stood there, half-hidden by an arbor of morning glories, she saw a dim figure come out along the slope from the direction of the woods edge, and as it passed her, scarcely a dozen feet away, she recognized Alan. He went on to the factor's house. She heard him knock, heard him ask for her, heard his puzzled "That's odd," when Mrs. Drummond said she'd been gone for half an hour.

By a lightning flash Joyce saw him as he started on past her. Something in his manner, in his dejected head, in his slow beaten gait, let her know he was aware she deliberately had gone away in these last minutes and deliberately had shunned a parting talk with him.

As Alan went slowly past the garden, unconscious of the lightning flashes, thinking only that Joyce, who had burned his picture and his gift, was now refusing a last hour with him, he heard a voice in the windy blackness. It sounded like his name. In surprise he whirled toward the arbor of morning glories, and as he stood there, listening, he heard it again—his name—Joyce's voice, half-singing:

"Alan! Don't—don't go. . . . I'm—I'm here. . . ."

CHAPTER XIV.

The North's Call

As she worked on a report that evening in the little library nook, Joyce would pause now and then and listen absently, with her dark eyes peering into the blackness outside the window.

It was time for Alan to be returning with Bill and Ted from a patrol down the Mackenzie. In the sharp vigorous gusts of October wind she kept thinking she heard the drone of the launch. Across the room from her, on a blanket-padded couch, little Marion Montgomery had fallen asleep over a picture book, her tiny moccasins off, one arm hanging over the couch. In the deep dreamless sleep of babyhood the little tot was oblivious of the threat and snarl of autumnal wind swirling around the cabin. If there was any sacrifice in having that airy little companion in her home, Joyce had not yet become aware of it.

The report she was working on was a statement to her former bureau chief in Ottawa of the money expended in her work among the Indian women around Endurance.

During a lull in the wind she suddenly heard the muffled sound of the big police boat skimming up the wave-tossed Mackenzie. Putting aside her report, Joyce ceased being Deputy Indian Agent at Fort Endurance, N. W. T., and became the wife of Inspector Baker, officer commanding there. With a glance at the sleeping tot she hung a cape about her shoulders and went out the cabin and ran down the dark winding terrace toward the wharf.

When the yellow eye of the launch drew near, Joyce saw a tall figure step upon the prow half-dark and stand ready with the painter chain.

When he jumped out upon the plank, jerking the launch alongside and lapped the painter around a pier-head, he turned to her, hat in hand, replying:

"Girl, you shouldn't have come down here, in this raw wet wind. You've got to begin learning to be careful."

Pedestalt snapped off the launch searchlight; and as the two men began gathering their packs together in the mantling darkness Joyce al-

lenced Alan's reproach, rising on tiptoe, oblivious of his wet slicker and the cold steel of his gun buckle.

After supper, when Alan had made himself regimental again after the six-day and night patrol, he stepped out into the living room where Joyce was finishing her report.

She beckoned him over to her, holding out several letters which had come for him on the Chipewyan mail. She had not opened them; but now when he brought a chair beside her, she read them with him.

Buzzard had dashed off a page from his apartment address in Winnipeg. He had "done" a couple dozen fairs and pumpkin shows in his new Dellaville, had found that line too tame. Right now he was flying the Winnipeg-Edmonton lap of the Air Mail. Next spring he was going to boss the "smoke hawk" division of the Manitoba Fire Prevention, with a circus of ten scouting "planes" under him.

"Some time this winter (he postscripted), we might put kids on the crate and hop down north to visit you. But Alan, you find out first if Joyce holds anything against me for telling you she burned that rainbow scarf. I don't think she ever has forgiven me."

Joyce looked up, laughing, but with a catch in her voice as she remembered that haunting day.

"Did you notice the 'we,' Alan? He puts her in a postscript! She's just a mere afterthought! Who is she?"

"Louise of Kamloops, is all I know," Alan answered.

The next evening she was an enigma. It contained no message, no writing—nothing but two pictures. One was a panorama of a large country estate, with lawns, servant quarters, gardens, orchards. The other showed an imposing town residence, a stone building overrun by ivy, with a lunatic waiting in the doorway.

Beside them, Alan looked at the pictures twice, searched in the envelope for a possible note, glanced again at the address. And then, as he studied the crest of the envelope, he started a little. This was from Elizabeth! That insignia was the Lamroth-Haskell crest! Since Haskell married her, and they left the North, they had written to one on at Endurance; but Alan had heard that Haskell, transferred to a small detachment in the Kootenay coal fields, had resigned and gone east.

Suddenly understanding the pictures, Alan looked up at met Joyce's eyes, and he saw that she too understood. In a kind of scorn she remarked:

"That's like Elizabeth, isn't it, Alan? She wants you to realize she's got a country estate and town house and uniformed chauffeur and all the things that—that."

"Say it?" Alan bade. "—All the things I'd never been able to give her. She's trying to rub it in. Yes, it's like her, Joyce."

"Sometimes I pity her a little—with them, Alan."

"I wouldn't say that, Joyce. I know her better than you did. I'd say, God pity him—with her."

With a gesture of finality he slipped the pictures contemptuously into the fireplace.

Later, when the lights of the post were out, when the fire logs had burned to red coals and Joyce had carried her sleepy little charge away to bed, they went outside the cabin.

In the night sky they heard the honking of Arctic geese, last of the migrants, winging swiftly south; and they had the feeling that in the illimitable woods all furry creatures were seeking out warm dens and storing food for the Frozen Moons. Up and down the wilderness rivers and far-flung over the Strong-Woods, a whisper had gone abroad of a mighty change brooding—a whisper that drove outrageous things into headlong flight, yet was but a challenge to those more valiant of heart. The spirit of winter was in the air tonight; and Alan and Joyce were welcoming it. Here in the far North they had lived through other winters; they knew the savagery of those Moons and their white silent beauty, too. They had worked to keep them bused during the long Dark, and a home against the blind swirling blizzards, and the vista of a life together here in this far land of their choosing.

Youth Seen In Attempt To Adjust

Stirred by modern youth's desperate efforts to adjust itself to the complicated demands made by life and a rapidly changing world, Edna Robb Webster, noted serial story writer, has given her attention to the problem in her latest book, "Occasional Wife," a romance of modern marriage. The story begins in this paper at an early date.

Mrs. Webster takes as her two chief characters, Camilla Hoyt, adopted daughter of a wealthy family, and Peter Anson, poor and struggling artist. They love each other as much as if they were married. Camilla, who wants to marry, Camilla, who foster mother, wants her to marry for money, is not to share in her family's wealth when she comes of age, but she is trying to carve out a career for herself as a commercial painter of a large country estate, with lawns, servant quarters, gardens, orchards. The other showed an imposing town residence, a stone building overrun by ivy, with a lunatic waiting in the doorway.

Beside them, Alan looked at the pictures twice, searched in the envelope for a possible note, glanced again at the address. And then, as he studied the crest of the envelope, he started a little. This was from Elizabeth! That insignia was the Lamroth-Haskell crest! Since Haskell married her, and they left the North, they had written to one on at Endurance; but Alan had heard that Haskell, transferred to a small detachment in the Kootenay coal fields, had resigned and gone east.

Suddenly understanding the pictures, Alan looked up at met Joyce's eyes, and he saw that she too understood. In a kind of scorn she remarked:

"That's like Elizabeth, isn't it, Alan? She wants you to realize she's got a country estate and town house and uniformed chauffeur and all the things that—that."

"Say it?" Alan bade. "—All the things I'd never been able to give her. She's trying to rub it in. Yes, it's like her, Joyce."

"Sometimes I pity her a little—with them, Alan."

"I wouldn't say that, Joyce. I know her better than you did. I'd say, God pity him—with her."

With a gesture of finality he slipped the pictures contemptuously into the fireplace.

News from Wembley.

The weather has been fine for the past week with the odd shower and a slow wind.

Crops in this district are 100 p.c. with the wheat coming fine. A rain was had just when it was needed badly. Gardens around this locality are fine also. Everybody is already using lettuce and radish and Wembley Town potatoes will be ready.

Mr. Mut Graham is back from his trip to Edmonton and Stony Plain. On being questioned by the reporter Mr. Graham stated: "Seeing it is only 23 years since I saw Edmonton it has surely had a great change."

Mr. H. Trelle of Wembley is leaving on the 18th day of July for the Regina Fair.

On June 30 a picnic was held for the school children on Coopers Point. About 150 folks turned out to enjoy the afternoon in playing softball

Brightbank News

The Misses Isobel and Margaret Clark of Edmonton spent a week's vacation at the home of their parents, Mr and Mrs C. Clark.

Miss Shiela Young made a motor trip to Stony Plain on Friday last.

The combined Hansen Corners and Brightbank picnic will be held on Friday next, the 21st.

Road work is progressing very favorably; everybody is very pleased to get the road started up sec. 11, twp. 52, rg. 2. A petition has been circulated to get \$500 on it and get free gratis work. It is said Mr. A. Kreye is to be the foreman.

Mr. Lyle Akins of Mewassinn was visiting friends in this district on Sunday last.

and other games. At six o'clock lunch was served.—T. B.

Miller—Place.

The wedding took place in Edmonton on Wednesday last, July 12th, of Miss Frances Marion (daughter of Mr. W. B. Place of Edmonton and the late Mrs. Place) to Mr. George C. ("Con") Miller (son of Mr. and Mrs. Peter Miller, of the Mewassinn district). The ceremony was performed by Rev. Dr. Hollinsworth of Calgary, at the home of the bride's parent, 10416 84th ave.

The bridegroom was the popular teacher for several years at Lucknow school. He resigned from this position at the close of the last session; and now has accepted the position as principal at the school at Carmangay, to which town he has gone with his bride.

Holborn Happenings.

A daudy crowd attended the last dance given in the local hall, when splendid music was produced by the Stony orchestra.

The Junior meeting, postponed from the 8th, was held Sat. last, with a fair attendance.

Mr. and Mrs. Anderson arrived home on Friday from Wetaakiwin, where they were in attendance at the wedding of Mr. Anderson's sister Agnus.

Holborn athletes made a good showing at the Bright Bank picnic, held last week. A party intends taking in the U.F.A. picnic over at Hy Summerfield's farm.

The topic heard at most of the open-air discussions now is "Binder Twine," with the "Price of Wheat" a close second.

The local ball team received an invitation to participate in the big tournament at Tomahawk this week.

Checking Up Fertilizers.

Owing to the activities of the markets and fertilizer division of the Dominion Seed Branch, practically no brand of fertilizer offered for sale in Oanada in the past five years has escaped being analysed at least twice in each inspection district where it is sold, says Mr. J. H. McLaughlin, agent for Elephant Brand Fertilizer, manufactured at Trail by the C. M. & S. Co. In this way farmers are assured that the proper amount of plant food will invariably be found in their purchases of fertilizers.

Acreeage in Crop.

It is estimated by the provincial department of agriculture that there has been a reduction of from six to eight percent, in the area seeded to wheat in the province, from that sown in 1932, when the wheat area was 8,201,000 acres. The area sown to oats has been slightly increased, while that sown to other crops shows a slight decrease. The lateness of the spring season, and low prices were largely responsible for the decrease in the wheat acreage, with the consequent increase in oats.

More Work—Less Money.

It appears, from perusing the advts. in the daily papers, says the Vermilion Standard, that rural teachers are to be called on for more work for less money than ever. A few years ago grade 9 was the highest grade that a rural school board essayed to have taught. Now 9, 10 & 11 with languages is frequently demanded, with salaries varying from \$600 to \$840.

Stony Plain and District

Donald MacLeod, M. L. A., left on Monday, to attend the convention of the Cooperative Commonwealth Federation at Regina.

Stony's baseball Juveniles are billed to play a game up at Cardiff on Sunday next, the 23d. The boys are now getting in some good practise work, and expect to duplicate their score made on their last trip abroad.

Mr. M. B. Donaldson returned to Stony on Friday from his motor trip to Portland, Ore. He had accompanied Mr. and Mrs. Geo. McMillan and Mr. Frank. The party was met at the Coast by Dr. and Mrs. Ronelsen of Montreal, the latter having gone by train.

An unprecedented amount of grain, for the month of July, has been coming to local elevators—so much so that several of the elevator agents who had figured on taking vacations have postponed these to a later date.

Messrs Otto Hoffman, Jac Enders, Thos Graden and M. McKinlay were present in Calgary last week at the shoot held by the Calgary rifle club.

Don't forget the Community dance at Muir Lake Hall, on the evening of Friday, July 28th, with the Snappy Four Orchestra.

A meeting of Stony Plain Local of United Farmers was held in their hall, over the P.O., on Saturday last, the 15th, at 3 p.m. Action on the question of holding a picnic and fishing match, was deferred.

BUTTER AND EGGS WANTED at The Royal Cafe.

Kastner—Ulmer.

A wedding of much interest in the district was solemnised in St. John's Lutheran church, Wed. June 21. The happy parties were Walter Kastner of Wembley and Elsie, third daughter of Mr. and Mrs. Jac Ulmer. Rev. E. G. Wildegrube performed the ceremony.

Annie and Clara Hennig were bridesmaids; the bridegroom was supported by Geo. Ulmer and Armand Kastner. Late in the evening Mr. and Mrs. Kastner left by car for their future home in Grande Prairie.—Grand Prairie Tribune.

Bright Bank U. F. Picnic.

The Bright Bank United Farmers' Local intends holding their annual picnic on Friday next, July 21st, on the farm of Henry Summerfield. This proved to be a very good picnic grounds last year, and it is expected the crowd this year will be even greater, providing the weather is favorable. There will be games of all kinds, with good prizes to be awarded the winners. There will be a dance in the evening.

Spruce Grove News

Miss E. Goebel is spending a vacation with her aunt Mrs. Willie at Lacombe.

Miss Florence Taylor of Edmonton is spending part of her extended summer vacation at the station house with Mrs. Elder.

Mr. and Mrs. J. J. Jersperson, who had been motoring thru many interesting parts of Alberta and Saskatchewan, returned home Tuesday morning, July 18.

Mr. and Mrs. Herman Duchole arrived home from the honeymoon on Sunday, and took up their residence on East 1st avenue. A very large crowd attended their wedding dance which was held at the Strawberry Creek schoolhouse Sat. July 15.

Mrs. Dan Brox has been appointed to the Reception Committee at the Old Timers' Log Cabin for Friday.

Mr. Herman Loeblich made baseball history at the South Side ball grounds on Friday last, when he pitched for the Arctics against Calgary Pucksters, his team winning by 3 runs to 2 in 11 innings. This was the first time the pucksters had been defeated.

With the Jokers.

Pitcher—But surely seeing is believing.

Manager—Not necessarily. For instance, I see you every day.

Someone Was Pleased.

It was a wretched game; long before the 5th inning the assembled fans began to boo and hiss. But there was one man who clapped his hands vigorously.

"I say," said the man next to him, "you've got yer nerve to applaud this shocking game. Whadda yah see in it?"

The man smiled and replied heartily: "It's not the game I'm applauding, me man, but the beautiful, whole-hearted hitting."

Hoot, Mon!

A rather amusing incident occurred in connection with an accident on the main road west from Winnipeg where the narrow stretch of pavement is pitted with cows every hour of the day and night.

The owner of a new car, a burly Scotsman, was driving west in all the pride of possession of his first car and met a particularly stupid specimen of the cow brand with the result that there was a disastrous collision, resulting in the death of the cow and a badly smashed automobile.

The owner of the cow appearing on the scene, there was a hot argument as to the settlement. The Scotsman endeavoring to show that it was entirely the fault of the cow, said, "Why, mon, I had to kill the damned thing to get by, and you are better off than I am for ye can eat the oco, but I canna eat the car."

Little Wilkey.

The Boy Wonder, who predicted his team would be in the play-offs. Wilkey is some predictor, as some 8 months ago Wilkey predicted snow for Xmas. Next week, armed with a peaked hat and pleasant smile, Little Wilkey's going out to predict the number of grizzlies in the Rockies.

SCHOOL GIRL WINS CHEVROLET.

Dorothy Maciejewsky, 8-year old Chicago school girl, now knows the thrill of falling heir to unexpected good fortune. Her name was drawn from among 400,000 as winner of the first car built on the assembly line operated by Chevrolet at the Century of Progress Exposition in Chicago. Dorothy's father works part time as a janitor. No member of her family has ever owned a car. Dorothy's 24-year-old brother, unable to get work for some time past, will serve as her chauffeur. The car was a gift of Chevrolet, President W. S. Knudson insisting that the first automobile off the line be given not to a person of national prominence, but to some Chicago school child, below 8th grade. Dorothy's car was the 1st of many hundreds of Chevrolets built on the Chicago fair grounds since shortly before the opening of the Exposition. Demand for Chevrolets "to drive home from the Fair" has been running ahead of production.

Don't Buy an Auto!

until you have looked over our reconditioned used cars. All at real bargain prices. Come in and look them over, for your satisfaction. Several makes to choose from.

- 1929 Fargo Truck, good tires, fully overhauled. **\$350**
